36

Bachelor of Science

MONTHS

Available Online: This program is delivered fully online.

Idaho Locations: Boise, Nampa

Utah Locations: Layton, Lehi, Logan, Ogden / West Haven, Provo / Orem, Salt Lake City / Murray

Health Information Management (HIM) is a key function of the healthcare delivery system in the United States. HIM provides for the maintenance of health records in hospitals, clinics, health departments, insurance companies, governmental agencies, and other settings.

A Health Information Management professional works with clinical, reference, epidemiological, financial, and demographic data and is responsible for the collection, the storage, the use, and the transmission of this information. The role of the HIM professional is becoming increasingly important as the healthcare industry continues to transition to electronic information management with Electronic Health Records (EHRs).

The Bachelor of Science in Health Information Management prepares the student for entry-level positions such as inpatient/outpatient coder, health information technologist, coding data coordinator, and clinical information systems technologist.

May be completed in as few as 30 months under a flexible accelerated schedule.

COURSE NO	COURSE NAME	CREDITS	COURSE NO	COURSE NAME	CREDITS
ACC101	Accounting Fundamentals	6.0	HSM320	Principles of Epidemiology	4.0
ACC108	Computerized Accounting	3.0	HSM410	Leadership in Healthcare	4.0
