

# Healthcare Administration with a Gerontology emphasis

**36**

Bachelor of Science

MONTHS

**Idaho Locations:** Boise, Nampa  
**Utah Locations:** Layton, Ogden / West Haven

Designed to provide healthcare practitioners and others with the skills and competencies to function as supervisors and managers in healthcare settings or in a business environment requiring management skills. This program is designed to help the professional meet increasing responsibilities. The curriculum provides a working foundation in management and interpersonal skills, while at the same time introducing the student to the healthcare delivery system and to business challenges with varied issues. Graduates are not only better prepared to assume increased management responsibilities, but to do so with a better understanding of the complex system in which they work. Students are prepared to work in entry-level management and accounting positions in hospitals, clinics, long-term care facilities, and related businesses.

Students earning an emphasis in gerontology often work with clients and patients one-on-one. Gerontology professionals work in a variety of fields that address the health, nutritional, financial, and social needs of the senior population.

May be completed in as few as 30 months under a flexible accelerated schedule.
